Service Standard

Meeting users' needs

- 1 Understand users and their needs
- 2 Solve a whole problem for users
- 3 Provide a joined up experience across all channels
- 4 Make the service simple to use
- 5 Make sure everyone can use the service

Providing a good service

- 6 Have a multidisciplinary team
- 7 Use agile ways of working
- 8 Iterate and improve frequently
- 9 Create a secure service which protects users' privacy
- 10 Define what success looks like and publish performance data

Using the right technology

- 11 Choose the right tools and technology
- 12 Make new source code open
- 13 Use and contribute to open standards, common components and patterns
- 14 Operate a reliable service

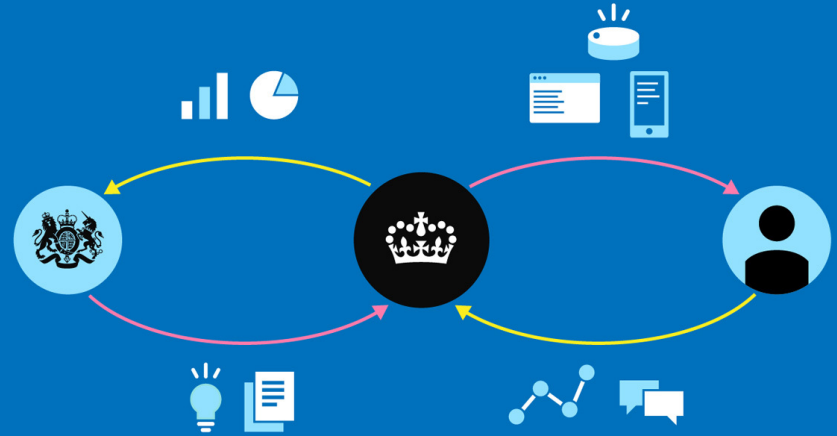

**Find a solution
that suits all
users**

USERS

**Understand
user need,

An aerial photograph of a landscape with a winding river and a network of roads. A thick green line highlights a specific path that follows the river and branches out into the surrounding terrain. In the center of the image, there is a text box with two lines: 'EMBED' on a black background and 'THE MIDDLE MILES' on a white background. A white arrow points downwards from the text box to the highlighted path.

IT'S NOT FINE, AND YOU HAVE
A RESPONSIBILITY TO ACT.

**There is scope to define
and change the role**

**Embedded product
thinking can drive public
services and innovation**

Even if value isn't immediately realised, you can positively contribute to affecting change in the long term

It depends.

Thanks!
